PROFILE SUMMARY

AI & Data Science student with hands-on experience in building and deploying ML models using Scikit-learn, TensorFlow, and Ultralytics YOLO. Skilled in Python, data preprocessing and model tuning. Strong foundation in statistics, computer vision, and deep learning, with a passion for solving real-world problems through AI.

EDUCATION

Bachelors of Engineering |Artificial Intelligence and Data Science 2022 - 2026
MET's Institue of Engineering , Nashik T.E. CGPA: 9.12

SKILLS

Technical Skills	Python, C++, MySQL
Libraries/Frameworks	Tensorflow/Keras, Scikit-learn, Ultralytics (YOLO), Flask
Data Analysis	Pandas, Matplotlib, Seaborn, PowerBI, EDA, Feature Engineering, NLP
Tools	Jupyter Notebook, Google Colab, GitHub, Arduino IDE
Soft Skills	Problem-Solving, Communication (English, Marathi, Hindi), Team-work

EXPERIENCE

Robotics Intern Dec 2024 - Jan 2025
Raybot Automations Pvt. Ltd. *Nashik, MH*

- Built prototypes like smoke detector, alcohol detection, line follower and robotic arm.
- Led team of interns at an event by completing all tasks within time.
- Worked with Arduino, ESP32 and Sensors along with 3D printer.

Python Programming Intern July 2024 - Aug 2024
MyWorkDaily.com *Remote*

- Developed Desktop apps, such as Quiz App, Calculator, Weather App, Password Generator using PyQt5.
- Practiced Python control structures and API interaction.

PROJECTS

Face Mask Detection |Skills Stack: Python, Ultralytics YOLOv8, Google Colab, Roboflow, OpenCV
Built a custom object detection system to classify faces as 'Mask' or 'No Mask' using YOLOv8. Trained model on Google Colab; Discovered the dataset at Roboflow. Achieved 93.5% mAP accuracy and tested model via image upload; real-time detection done through Webcam. ([Check it here](#))

MNIST Digit Classifier |Skills Stack: Python, Tensorflow, Keras, Deep Learning
Trained Feedforward and Convolutional Neural Networks on MNIST and Fashion-MNIST datasets. Achieved 98.2% accuracy for digit classification and 90.9% for fashion item recognition. Tuned batch size and learning rate, monitored training/validation loss, generalized model and reduced overfitting. ([Check it here](#))

Resume Skills Extractor and Ranker |Skills Stack: Python, Flask, Text Analysis
A Flask-based web application that extracts skills from uploaded resumes and ranks them based on relevance to a given job description. Utilizes PDF parsing (PyMuPDF), string matching, and simple scoring logic to highlight top candidates. Supports multiple resume uploads and returns ranked results. ([Check it here](#))
